

## **Call for Student Poster Presentations: Innovations in Water Quality Treatment and Management**

**StormCon August 3-4,  
JW Marriott Hill Country Resort, San Antonio, Texas**

**Texas A&M University-Kingsville and the Lower Rio Grande Valley TPDES Stormwater Task Force comprised of 17 local municipal and county governments are hosting a student poster competition at the StormCon 2010 Conference centered on water quality management and treatment at the JW Marriot Hill Country Resort in San Antonio on August 3 and 4. The objective of the competition is to provide undergraduate and graduate students focused on water quality engineering with an opportunity to showcase their research and achievements to the professional audience at StormCon 2010.**

**StormCon is a venue that joins thousands of professionals responsible for stormwater management, including municipal and tribal managers, state and federal regulators, engineers, consultants, highway and heavy-construction contractors, developers, compliance professionals, design professionals, researchers, nonprofit professionals, and officials at special sites, such as ports, airports, and military bases. Stormwater management is a fast-changing discipline and StormCon is the only professional conference and exposition where the attendee can learn about the latest stormwater program management innovations, BMPs performance case studies, research, technology, and services. StormCon is the discipline's international networking, education, and training center. StormCon also features the largest exhibition of stormwater equipment and technologies in one place.**
